Question:	What aspects of the course contributed most to your learning?
Response Rate:	100.00% (8 of 8)
1	Working with qualtrics and doing research
2	This research class was not simply a lecture. It included lecture/powerpoint review of the reading material synthesized/summarized for our learning with examples and class discussion and then included lab time where we were able to work with our group and the professor joined each group individually to assist and answer questions. I thought this was very effective via zoom and also teaching this subject matter.
3	The group project helped me understand the material more clearly. I was able to apply everything I learned from lectures to the project.
4	Team collaboration.
5	Learning to better read and understand research articles. This course has definitely made me more effective in that area which makes reading research articles for other classes more effective and allows me to better understand other course material.
6	I thought this Professors class was awesome!! He took the time to help me outside the classroom and made sure I was understanding the material!!!

7	Hands-on experience and asynchronous learning.
8	Group work

Question:	What aspects of the course contributed least to your learning?
Response Rate:	75.00% (6 of 8)
1	The long lectures and quizzes.
2	Quizzes
3	Quizzes
4	None
5	I think the class format was great. I rented the book, but did not need to read it. I referenced it along with the lecture notes to study for the quizzes, but the book was not necessary for this class. What did work is to study the professor's lecture notes/powerpoint slides which made sense of the readings.
6	Everything contributed in its own way.

Question:	What, if any, suggestions do you have for improving the course?
Response Rate:	75.00% (6 of 8)
1	No, I think the course is fantastic and the professor was very nice, and respectful. he was also flexible!
2	No quizzes
3	I would recommend continuing this class format. It worked. I liked our class and our groups were effective and worked well together. When we gave feedback to the professor, he immediately integrated it - e.g. giving time for introverts to ask questions.
4	Eliminate quizzes. Really spend more time on projects because I believe the way to understand this course is through applications. Practice. Practice. Practice. Also, discussions helped a lot.
5	Course would be easier to handle in person, in my opinion.
6	Continue the team collaboration work.
